

You will find attached an image (**org\_create.jpg**). Using this image as a reference and the existing [www.hubgets.com](http://www.hubgets.com) website, create a new page that will act as a startup point for a user sign-up flow (reference attached).

Notes:

- CSS must be integrated into the current website structure
- Implementation **must be responsive**
- Try to write the minimum number of lines possible
- Implementation must work in all major browsers, including IE 9 and newer versions
- Do not worry that you do not have the icons in the attached image, use some reference ones.
- Prove attention to details

The quality of the work is very important. If you have any questions, do not hesitate to let me know.

Good Luck!
